Evaluating Social Programs

J-PAL Europe Executive Education Course
Aarhus, September 9-13, 2013

J-PAL Europe is organizing a five-day course, led by affiliated professors from J-PAL, that will teach participants how to measure the effects of poverty programs scientifically and help shape better policies through the use of randomized evaluations.

The course is designed for participants from a variety of backgrounds, including managers and researchers from governments, international development organizations and managers in non-governmental organizations from around the world.

Through both lectures and group work, participants will be given a thorough understanding of randomized evaluation, including:
- When randomized evaluations are appropriate, and how they avoid common pitfalls
- The key components of randomized evaluations
- Guidelines for successful implementation of a randomized evaluation
- How to interpret and present the results

This course will be held at the Aarhus University in Denmark. Participants must apply by May 17, 2013.

To apply for this course or to find more information, you can visit http://www.povertyactionlab.org/course
