

PSE Macro Days 2023

October 16-17, 2023

Call for Papers – Deadline July 23 – early submissions encouraged

The [Macroeconomic Risk](#) and [International Macroeconomics](#) Chairs at the Paris School of Economics are pleased to announce the 2023 edition of the PSE Macro Days on the topic:

Structural changes and their implications for Macroeconomic Risks, Dynamics and Policies

Structural change is all around: economies age; global warming changes our economies while the green transition is still at its beginning; computers and machines perform ever more tasks; labor force participation and working patterns have undergone profound changes following the COVID 19 pandemic; and geopolitical risks have intensified over the last 2 years. This conference looks at the implications of such structural changes for the macroeconomic risk environment, for macro dynamics and policies.

The organizers invite submissions of papers and extended abstracts on topics including, but not limited to:

- Aging and demographic changes
- The productivity slow down
- Automation and labor-market polarization
- Monetary policy and the green transition
- The changing nature of the business cycle
- Globalization and fragmentation

The conference is planned as an in-person event in Paris. The organizers can cover travel and accommodation expenses for the presenter of accepted papers and discussants. To submit, please send a pdf of your paper to the following email address: macro@psemail.eu

The deadline for submissions is **July 23**. Early submissions are encouraged as we will have a first round of evaluation on 8 July. Decisions will be made by **July 31**.

Keynote speakers

TBC
