Current Position

Janeway Institute and Keynes Fund Postdoctoral Researcher, *University of Cambridge*
College Research Associate, St. John's College, *University of Cambridge*

Research Fields

Microeconomic Theory, Behavioral Economics, Experimental Economics

Summary of Research Agenda

My research connects bounded rationality with social influences on behavior, with a focus on occupational and educational choices. I study how people use social identity and culture to simplify complicated choice settings. I then analyze how this behavior contributes to the persistence of inequalities across groups, stereotypes and norms.
